

CSC240 - Program #11
Due Monday, April 13

In Prolog, create definitions for the following rules:

motherOf(<mother's name>, <child's name>).
fatherOf(<father's name>, <child's name>).
sonOf(<son's name>, <parent's name>).
daughterOf(<daughter's name>, <parent's name>).
siblingOf(<sibling's name>, <person's name>).

as well as similar rules for...

auntOf, ancestorOf, and descendentOf.

also, add the following:

contemporaryOf(<person>, <contemporary>). % Alive at the same time
successorOf(<ruler>, <next ruler>). % Immediate successor on the throne

Submit the code in one attachment to simms@mesacc.edu
